## ABOUT ME

I'm a passionate Full Stack JavaScript/TypeScript Programmer with a knack for crafting dynamic digital experiences. My journey has been one of self-driven learning, where I've mastered the art of creating progressive web applications that captivate and engage users.

I'm equally comfortable at the front-end and back-end of development. From wrangling data to shaping seamless user interfaces, I thrive on bridging the digital world's creative and functional aspects.

My path has been shaped by real-world challenges. As a self-taught developer, I've not only honed my technical prowess but also developed an exceptional problem-solving approach with an eye for detail, ensuring top-tier quality in every solution I create. My expertise also spans technical content creation, SEO strategies, user experience (UX) design and blockchain/cryptocurrency/web3.

My journey has taken me from the world of Geography to the heart of tech innovation. With experience in agricultural extension and community engagement, I've developed the versatility to connect with diverse audiences. This ability to collaborate across teams and engage communities has seamlessly merged with my technical skills, making me a valuable asset in any project's life cycle.

When I'm not immersed in code, you'll find me exploring emerging technologies and refining my craft. I believe in the power of continuous learning to stay at the forefront of this ever-evolving field.

I invite you to explore my portfolio, where you'll witness my passion for crafting captivating user experiences that resonate with the digital world. Let's collaborate and create something extraordinary together!

## WORK EXPERIENCE

### Malin Energy

Volunteer, internship | Frontend Developer  
Abuja , Nigeria  
2022-11-01 | Currently working here

As a lead web developer, I built and I'm also managing the website of Malin Energy. My responsibility after building the website is to periodically improve the website experience and

update it contents. Thus from regular bases, the company's Operation officer reach out to me with their required update for the website.

AME Digitals  
Management level | Lead Software Developer  
Abuja , Nigeria  
2018-01-01 | Currently working here

In AME Digitals, I'm engaged in full stack web development, I work on different projects using technologies like NodeJS, ReactJS, ExpressJS, MongoDB, IndexedDB, Vercel, GitHub and many other JavaScript Developer tools and technologies.

In AME Digitals, I also do web content creation and digital marketing. I used personal blogs and social media accounts to microblog for Fintech startup projects.
